

Skim the AWS Whitepapers

- You can read about some AWS White Papers here:
 - AWS Security Best Practices
 - AWS Well-Architected Framework
 - Architecting for the Cloud AWS Best Practices
 - Practicing Continuous Integration and Continuous Delivery on AWS Accelerating Software Delivery with DevOps
 - Microservices on AWS
 - Serverless Architectures with AWS Lambda
 - Optimizing Enterprise Economics with Serverless Architectures
 - Running Containerized Microservices on AWS
 - Blue/Green Deployments on AWS
- Overall we've explored all the most important concepts in the course
- It's never bad to have a look at the whitepapers you think are interesting!

Read each service's FAQ

- FAQ = Frequently asked questions
- Example: <https://aws.amazon.com/lambda/faqs/>
- FAQ cover a lot of the questions asked at the exam
- They help confirm your understanding of a service

Get into the AWS Community

- Help out and discuss with other people in the course Q&A
 - Review questions asked by other people in the Q&A
 - Do the practice test in this section
-
- Read forums online
 - Read online blogs
 - Attend local meetups and discuss with other AWS engineers
 - Watch re-invent videos on Youtube (AWS Conference)

How will the exam work?

- You'll have to register online at <https://www.aws.training/>
 - Fee for the exam is 150 USD
 - Provide one identity documents (ID, Passport, details are in emails sent to you...)
 - No notes are allowed, no pen is allowed, no speaking
 - 65 questions will be asked in 130 minutes
 - Use the "Flag" feature to mark questions you want to re-visit
 - At the end you can optionally review all the questions / answers
-
- To pass you need a score of a least 720 out of 1000
 - You will know within 5 days if you passed / failed the exams (most of the time less)
 - You will know the overall score a few days later (email notification)
 - You will not know which answers were right / wrong
 - If you fail, you can retake the exam again 14 days later

Your AWS Certification journey

Foundational

Knowledge-based certification for foundational understanding of AWS Cloud.

No prior experience needed.

Associate

Role-based certifications that showcase your knowledge and skills on AWS and build your credibility as an AWS Cloud professional.

Prior cloud and/or strong on-premises IT experience recommended.

Professional

Role-based certifications that validate advanced skills and knowledge required to design secure, optimized, and modernized applications and to automate processes on AWS.

2 years of prior AWS Cloud experience recommended.

Specialty

Dive deeper and position yourself as a trusted advisor to your stakeholders and/or customers in these strategic areas.

Refer to the exam guides on the exam pages for recommended experience.

AWS Certification Paths – Architecture

Architecture

Solutions Architect

Design, develop, and manage cloud infrastructure and assets, work with DevOps to migrate applications to the cloud

Architecture

Application Architect

Design significant aspects of application architecture including user interface, middleware, and infrastructure, and ensure enterprise-wide scalable, reliable, and manageable systems

https://d1.awsstatic.com/training-and-certification/docs/AWS_certification_paths.pdf

AWS Certification Paths – Operations

Operations

Systems Administrator

Install, upgrade, and maintain computer components and software, and integrate automation processes

Operations

Cloud Engineer

Implement and operate an organization's networked computing infrastructure and Implement security systems to maintain data safety

AWS Certification Paths – DevOps

DevOps

Test Engineer

Embed testing and quality best practices for software development from design to release, throughout the product life cycle

DevOps

Cloud DevOps Engineer

Design, deployment, and operations of large-scale global hybrid cloud computing environment, advocating for end-to-end automated CI/CD DevOps pipelines

DevOps

DevSecOps Engineer

Accelerate enterprise cloud adoption while enabling rapid and stable delivery of capabilities using CI/CD principles, methodologies, and technologies

AWS Certification Paths – Security

Security

Cloud Security Engineer

Design computer security architecture and develop detailed cyber security designs. Develop, execute, and track performance of security measures to protect information

Security

Cloud Security Architect

Design and implement enterprise cloud solutions applying governance to identify, communicate, and minimize business and technical risks

AWS Certification Paths – Development & Networking

Development

Software Development Engineer

Develop, construct, and maintain software across platforms and devices

Networking

Network Engineer

Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, etc.

AWS Certification Paths – Data Analytics & AI/ML

Data Analytics

Cloud Data Engineer

Automate collection and processing of structured/semi-structured data and monitor data pipeline performance

AI/ML

Machine Learning Engineer

Research, build, and design artificial intelligence (AI) systems to automate predictive models, and design machine learning systems, models, and schemes

AWS Certification Paths – AI/ML

AI/ML

Prompt Engineer

Design, test, and refine text prompts to optimize the performance of AI language models

AI/ML

Machine Learning Ops Engineer

Build and maintain AI and ML platforms and infrastructure. Design, implement, and operationally support AI/ML model activity and deployment infrastructure

AI/ML

Data Scientist

Develop and maintain AI/ML models to solve business problems. Train and fine tune models and evaluate their performance
